

Patient + 1

For the safety of others, we are limiting visitors to accompany only patients who need assistance with their visits. The following patients can have visitors accompany them:

Pediatric Patients

**Adult Patients
Needing
Assistance**

Pregnant Patients

We request that the visitor wait in the car until the patient is called back to the exam room in order to abide by social distancing guidelines at OB offices.

To avoid having family and friends turned away from coming to a visit, we request that these patients only have ONE person accompany them to their visit.
